

iZOBI

iZOBI Handyman App is a unique marketplace, connecting freelance service providers with homeowners. Every homeowner knows that the worst thing about fixing up your house is having the right person for it. While contractors have accepted personal checks or credit cards in the past, a new future of using digital forms of currency is on the horizon. After growing in nearly every industry in the world, cryptocurrency has finally arrived in the home improvement sector, making those several-thousand dollar transactions just a little easier. iZOBI is providing a platform where the homeowner will get on-demand home improvement and renovation services.

We are an "Uber-like" platform that will support over 10+ services that would include:

- Electrical Repair and Installation
- Plumbing
- Electrical Appliance Repair
- Carpentry
- Painting
- Gardening
- Cleaning
- Nanny
- Caretaker
- Dog Walking

Customers can choose from two prices: EUR 15 or 20 for one-hour services and allow service providers to accept the work. They need to enter the address where they want to book the handyman. To book a handyman, it will take less than one minute.

You will be able to pay for services with iZOBI tokens for freelancers.

Freelancers will receive bonuses in iZOBI tokens when they complete a job for homeowners.

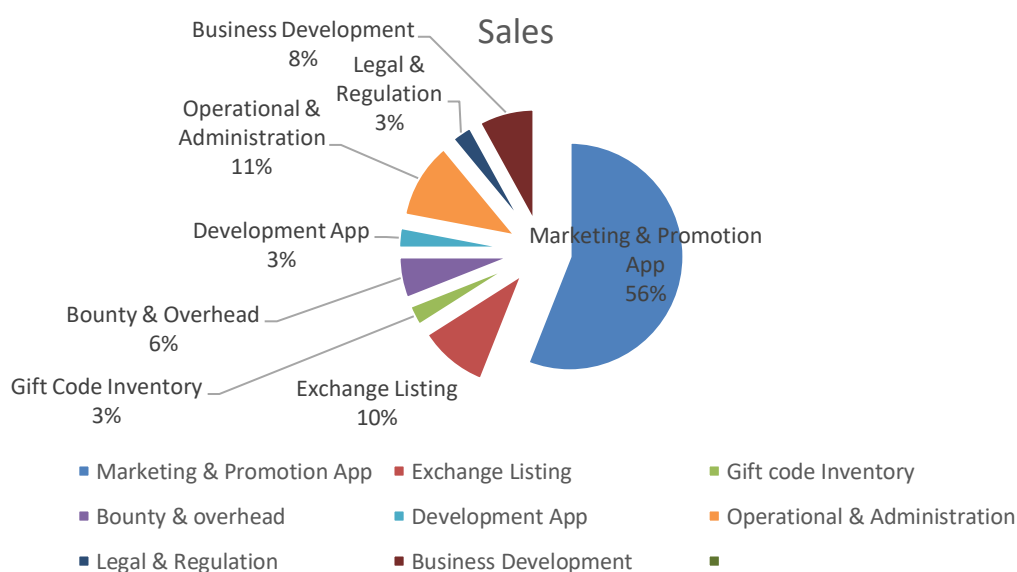

Apps:

There will be two apps: one for the service providers and one for the clients. The application will be available both on Google Play Store and App Store.
